

# Child Safety on the Information Highway

## Did You Know:

- 1 in 5 children received an illicit sexual approach or solicitation online this past year (50,000 child predators are online at any given time).
- 9 out of 10 children aged between 8-16 have viewed pornography on the Internet – usually unintentionally, while doing homework.
- The largest users of Internet pornography are children under the age of 17.

## The world's finest technology won't solve this problem!

The solution lies in early training and understanding that the best and most important software needed to win this war is what's between a child's ears.

With this in mind, Rosecrest Elementary is serious about helping you protect your children from the dangers of the Internet, as well as teaching them how to use it for good. Therefore, we are partnering with Children's Way – a PTA endorsed, non-profit organization - to bring your family *Wiggi World*™ and its Internet Basic Training.

*Wiggi World*™ is a fun and interactive child-safe Internet site where children (ages 6-12) and parents can go to:

- learn to use the Internet responsibly and safely,
- learn good citizenship by contributing time, talent, and energy to service opportunities,
- learn to balance their online and real-world activities,
- learn to use the Internet to connect with family members.

**Thank you for your great contribution as a parent in this community!**
